Timelines
Notes

1. A timeline is a chart of events.
   A. Shows order of events.
   B. Shows cause-and-effect relationships.
Notes

2. Tiered timelines show you two simultaneous time streams side-by-side.

3. Simultaneous means “at the same time.”
Creating Timelines

The events you write on your slips of paper should answer the following questions:

- **Who?** The people who took part in the event.
- **What?** What happened.
- **Where?** Where the event took place.
- **When?** When the event took place.
4. Creating a Timeline.
   A. Read the source, highlighting events and dates as you go.
   B. Write the events on slips of paper. Be sure they answer who, what, where, and when.
   C. Put the events in chronological order.
   D. Plot the events on your timeline.
